

Functional Block Diagram - Computers that communicate in English

(spontaneous machine English language processing)

Figure 1

1 of N transducers that change electrical signals into Ascii English Language sentences.

Computer Keyboard

① Voice

Other

An English Language sentence can give instructions on how to process the next sentence. 1 of N internal processors do analysis, parsing, and logic management of incoming sentences.

i.e. What is 3 times 7?
③
i.e. Get the time.

1 of N English Language sentence memories switchable by an English Language sentence.

Common Memory

Native Memory

To other computers, devices, people - all communications are done with English Language sentences.
